

Florian Jule

Portfolio

2015-2016: University of Michigan -
MS in Aerospace

2017-2025: Joby Aviation

- S4-1.0 (mech eng)
- S4-2.0 (tilt nacelle lead)
- S4-2.1 (tail and effectors lead)
- Special projects (mech eng)

2025-2026: Northwestern University -
MS in Robotics

Joby S4

4-passenger full electric vertical take-off and landing aircraft.

I worked on 3 versions:

- 1.0 full scale demonstrator
- 2.0 pre-production vehicle
- 2.1 production vehicle

Prototype: weight is paramount.

Production: weight and safety.

S4-1.0: first full scale

Team of ~50 to 100, ~1 year

Goal: demonstrate full scale eVTOL

I worked in manufacturing and testing

S4-2.0: pre-production

~100 to 300 people team, ~4 year program

Goal: demonstrate system level architecture for certification.

I was responsible for the tail and wing tip nacelles

- Conceptual design (aircraft architecture)
- Design
- Build
- Test
- Integration
- Flight test

S4-2.1: program

~300 to 2000+ people

Goal: design and certify an eVTOL aircraft with a 4-passenger payload.

I led the tail and effectors Integrated Product Team, 5 direct reports.

Sep 24
2023

Joby Delivers First eVTOL Aircraft to
Edwards Air Force Base Ahead of
Schedule

Dec 16
2024

Joby Completes First FAA Testing on
Major Aircraft Aerostructure

Apr 28
2025

Joby Achieves Testing Landmark with
Piloted Aircraft

S4-2.1: tail

Clean sheet to meet FAA requirements

Hand layup, AFP & machined parts

Met mass target

Delivery of production drawings

Passed structural testing for FAA credit

S4-2.1: effectors

- Nacelles
- Control surfaces
- Propellers

Joby Special projects

I worked on several novel aircraft designs in a small team

- Retractable landing gear
- Mechanical systems
- Structure testing
- Logistics

EXCLUSIVE: JOBY HYDROGEN-POWERED AUTONOMOUS AIRCRAFT EMERGES AFTER APPARENT 9-HOUR FLIGHT

HNTB
BRK

Northwestern Robotics

- Embedded systems
- Simulation
- Navigation
- Machine learning
- Robotic manipulation
- Optimal flight control
